Reason for Visit

Please list your current health concerns for your child

Is your child currently taking any medications or supplements? If so, please list them:

Newborn History

Please complete this section with respect to your child's first 18 months.

Were there any difficulties with pregnancy, labour or delivery? _____
Does (did) your baby go to sleep easily? _____
Does (did) your baby have a preferred sleeping position? _____
Is (was) your baby being breast fed? _____
For how long was your baby breast fed? _____ Weeks/months
Does (did) your baby cry a lot? _____
If yes, for many hours each day? _____
Does (did) your baby cry or become irritable during a diaper change? _____
Has (did) your baby had a fever? _____
Has (did) your baby had any falls? _____
Has (did) your baby been in a car accident? _____
Has (did) your baby had any other trauma? _____

Early Childhood History

Please also complete this section if your child has reached 18 months of age.

Does your child have any serious or chronic illnesses? _____
Has your child had any accidents or trauma? _____
Has your child been hospitalized for any reason? _____
Has your child had surgery? _____

Have you noticed any significant changes in your child's personality and/or behaviour? _____

Please let us know of any concerns that you would like to discuss:

Your appointment time is reserved for you. Please note that to cancel or reschedule your appointment, a minimum of 24 hours notice is required to avoid a late cancellation fee of \$25.

CANADIAN CHIROPRACTIC PROTECTIVE ASSOCIATION

CONSENT TO CHIROPRACTIC TREATMENT – FORM L

It is important for you to consider the benefits, risks and alternatives to the treatment options offered by your chiropractor and to make an informed decision about proceeding with treatment.

Chiropractic treatment includes adjustment, manipulation and mobilization of the spine and other joints of the body, soft-tissue techniques such as massage, and other forms of therapy including, but not limited to, electrical or light therapy and exercise.

Benefits

Chiropractic treatment has been demonstrated to be effective for complaints of the neck, back and other areas of the body caused by nerves, muscles, joints and related tissues. Treatment by your chiropractor can relieve pain, including headache, altered sensation, muscle stiffness and spasm. It can also increase mobility, improve function, and reduce or eliminate the need for drugs or surgery.

Risks

The risks associated with chiropractic treatment vary according to each patient's condition as well as the location and type of treatment.

The risks include:

- **Temporary worsening of symptoms** – Usually, any increase in pre-existing symptoms of pain or stiffness will last only a few hours to a few days.
- **Skin irritation or burn** – Skin irritation or a burn may occur in association with the use of some types of electrical or light therapy. Skin irritation should resolve quickly. A burn may leave a permanent scar.
- **Sprain or strain** – Typically, a muscle or ligament sprain or strain will resolve itself within a few days or weeks with some rest, protection of the area affected and other minor care.
- **Rib fracture** – While a rib fracture is painful and can limit your activity for a period of time, it will generally heal on its own over a period of several weeks without further treatment or surgical intervention.
- **Injury or aggravation of a disc** – Over the course of a lifetime, spinal discs may degenerate or become damaged. A disc can degenerate with aging, while disc damage can occur with common daily activities such as bending or lifting. Patients who already have a degenerated or damaged disc may or may not have symptoms. They may not know they have a problem with a disc. They also may not know their disc condition is worsening because they only experience back or neck problems once in a while.

Chiropractic treatment should not damage a disc that is not already degenerated or damaged, but if there is a pre-existing disc condition, chiropractic treatment, like many common daily activities, may aggravate the disc condition.

The consequences of disc injury or aggravating a pre-existing disc condition will vary with each patient. In the most severe cases, patient symptoms may include impaired back or neck mobility, radiating pain and numbness into the legs or arms, impaired bowel or bladder function, or impaired leg or arm function. Surgery may be needed.

- **Stroke** – Blood flows to the brain through two sets of arteries passing through the neck. These arteries may become weakened and damaged, either over time through aging or disease, or as a result of injury. A blood clot may form in a

damaged artery. All or part of the clot may break off and travel up the artery to the brain where it can interrupt blood flow and cause a stroke.

Many common activities of daily living involving ordinary neck movements have been associated with stroke resulting from damage to an artery in the neck, or a clot that already existed in the artery breaking off and travelling up to the brain.

Chiropractic treatment has also been associated with stroke. However, that association occurs very infrequently, and may be explained because an artery was already damaged and the patient was progressing toward a stroke when the patient consulted the chiropractor. Present medical and scientific evidence does not establish that chiropractic treatment causes either damage to an artery or stroke.

The consequences of a stroke can be very serious, including significant impairment of vision, speech, balance and brain function, as well as paralysis or death.

Alternatives

Alternatives to chiropractic treatment may include consulting other health professionals. Your chiropractor may also prescribe rest without treatment, or exercise with or without treatment.

Questions or Concerns

You are encouraged to ask questions at any time regarding your assessment and treatment. Bring any concerns you have to the chiropractor's attention. If you are not comfortable, you may stop treatment at any time.

Please be involved in and responsible for your care. Inform your chiropractor immediately of any change in your condition.

DO NOT SIGN THIS FORM UNTIL YOU MEET WITH THE CHIROPRACTOR

I hereby acknowledge that I have discussed with the chiropractor the assessment of my condition and the treatment plan. I understand the nature of the treatment to be provided to me. I have considered the benefits and risks of treatment, as well as the alternatives to treatment. I hereby consent to chiropractic treatment as proposed to me.

Benefit Assignment Form

Insurance Company: _____

Patient Name: _____ Date of Birth: _____

Policy Number: _____

Member ID Number: _____

If you are not the insured member, then please provide insured member name and date of birth.

Insured Member Name: _____ Date of Birth: _____

I hereby assign benefits payable for the eligible claims to the **Burnaby Heights Integrative HealthCare, Inc (the Provider)** responsible for submitting my claims electronically to the group benefits plan and I authorize the insurer/plan administrator to issue payment directly to the Provider. In the event my claim(s) are declined by the insurer/plan administrator, I understand that I remain responsible for payment to the Provider for any services rendered and/or supplies provided.

I acknowledge and agree that the insurer/plan administrator is under no obligation to accept this Assignment, that any benefit payment made in accordance with this Assignment will discharge the insurer/plan administrator of its obligations with respect to that benefit payment, and that in the event the benefit payment is made to me, the insurer/plan administrator will also be discharged of its obligation with respect to that benefit payment.

I understand that this Assignment will apply to all eligible claims submitted electronically by the Provider and that I may revoke it at any time by providing written notice to the insurer/plan administrator.

If I am a spouse or dependent, I confirm that I am authorized by the plan member to execute an assignment of benefit payments to the Provider.
